Brief in detail

Our clients had recently completed building their forever home and asked us to create a garden that captured the gorgeous field views yet was sharp and modern.

The key elements in this design were to create a bespoke garden building with a pyramid roof lantern, giving our clients a quiet, shaded place to escape.

We also installed 2 large interlinking porcelain patios to give them ample space for relaxing and socialising with their guests.

Raised porcelain planters were built and filled with an array of topiary, herbaceous and sentry planted Bay trees. A handmade water feature was installed which created sounds of tranquillity close to the house.

The garden and field views were framed in western red cedar venetian screening and lighting was set to the peripherals to create a warm evening glow.
